

## LAB 5 - WEEK 6

# APACHE PIG LAB – PART - 1

## Homework Questions

5 points each

### 1) Finding Word Count using Pig

Create a “.pig” script file and write all the commands needed to run word count example in Pig. Your script must correctly generate word counts for the given input file *InputForWC.txt*.

**Do not modify the given input file.**

**Submit the pig script file along with the screenshot of the output.**

### 2) Joins in Pig – Top 5 most visited sites

Create some sample data for “users.csv” and “pages.csv” files as discussed during lecture.

Find the top 5 most visited sites by users aged between 18 - 25.

**Submit the pig script file along with your input & output files.**

**Submit the screenshot of the output as well.**
